

Painting Carnations

St Oswald's
Hospice

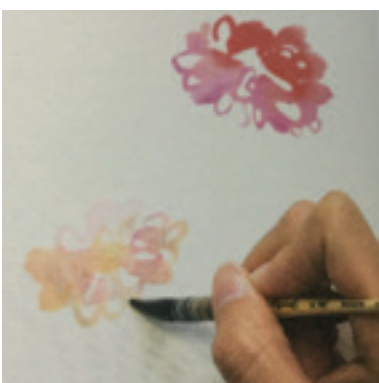

Follow these directions:

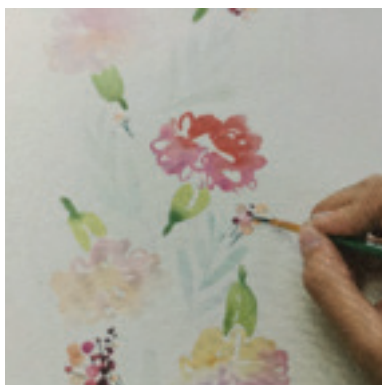

Start the image with the flowers which give structure to the final piece.

Paint the colourful part of the carnations first.

Angle the flowers in different directions to create movement.

Paint the green base of the carnations with a green-yellow following the direction of the flowers.

Add slender leaves in a light blue to highlight the flowers.

Arrange clusters of balls of different colours and sizes to balance the image.

Paint the stems of the clusters of balls with a fine brush.

Finish with details on the carnations to add lower layers.
