

Painting Anemones

St Oswald's
Hospice

Follow these directions:

Start the image with the flowers.

Paint from different angles and don't forget to leave white spaces.

Paint the stem of the anemone.

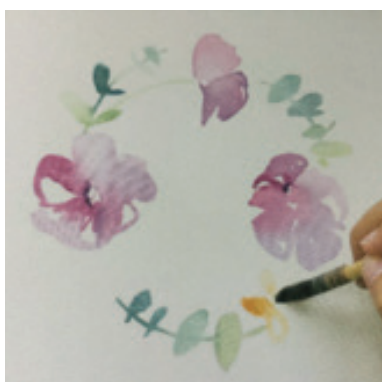

Add branches of eucalyptus – these provide the round shape of the circlet.

Then add clusters of orange-yellow flowers.

Paint several palm like branches overlapping the eucalyptus but make sure the first layer is dry first.

Arrange colourful balls round the circlet in colours similar to your flowers.

Outline the orange-yellow flowers using the tip of your brush.

Finish the image by painting the centres of the anemones using grey.
